
APT PLATFORM B.V.

Solution to all circularity pains

Picture your last deal. You called a contact, took the first offer, signed something, and moved on. But was it the right price? Were there better buyers? Was the paperwork correct? APT was built so you never have to wonder again.

- **Are you not sure what your scrap materials are actually worth?**
- **Do you sell scrap at a loss to get them out of the warehouse?**
- **Does finding a reliable buyer take days, sometimes weeks?**
- **Is the paperwork for each transaction a mess or a lot of work?**
- **Are new environmental regulations getting harder to follow?**
- **Do you suspect you're leaving money on the table, but don't know how much?**

The Solution? Three Steps. That's it.

No extra machines. No new software to learn. Just your phone and APT.

Launch the APT app

Describe what you need. Take a photo. It understands everything.

Get matched

APT automatically matches the right partner and materials with you.

Make money

The offer, the contract, the invoice: generated and sent. Just approve.

Ready for the most profitable and comfortable business experience in the circularity?

APT PLATFORM B.V.

What does this mean for your business?

More money from the materials you were giving away. Less time spent on administration. And full confidence that every transaction is documented and compliant. APT delivers all three, without adding work to your plate.

10x Up to 10x better price for your scrap materials

Hours, not weeks, to sell and buy materials, or close deals

0 Zero extra staff needed: APT handles the administration

Full paper trail: always ready for inspections and audits

What can APT do for you?

- Connect companies, find materials, and make business without lifting a finger
- Quotations, invoices, transport documents, and material analysis; generated and sent automatically
- Every transaction logged, every batch traced: bookkeeping and compliance build itself

Regulations are tightening. Are you prepared?

New EU rules require companies to track and report what happens to their waste. Fines are increasing. Audits are more frequent.

APT keeps a complete, automatic record of every material batch: what it is, where it came from, where it went, and who handled it. If an inspector walks in tomorrow, you're ready.
